Both *beauty* and *practicality* are the keynote of this glass.

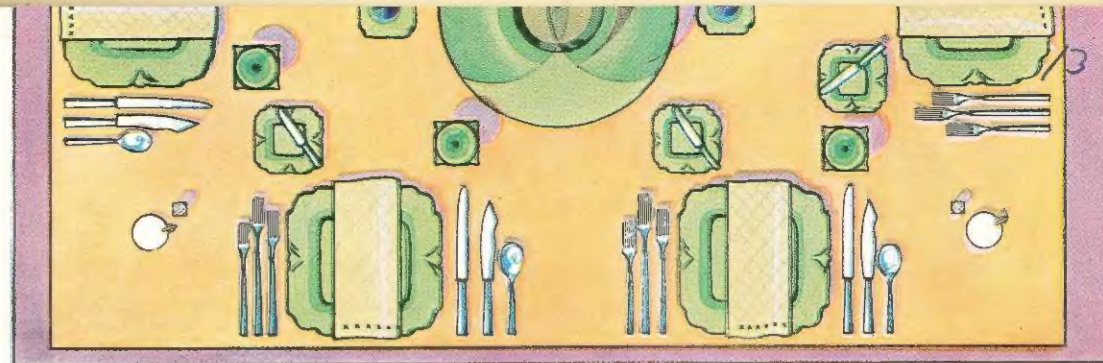

**S**ALADS are more enticing when served from delicately tinted bowls, to plates that match in shape and color. Somehow, too, drinks and desserts are more enjoyable in graceful, footed glasses. Some hostesses cleverly vary the colors for different events or use another color the next time the same guests come.

## HOW GLASSWARE BEAUTIFIES THE TABLE

By NANCY OAKLEY, Hostess Editor, *The Ladies' Home Journal*

What a perfect picture you may "paint" when you appoint the table with gleaming, shimmering glass! The captivating charm of glass is one of the most important reasons for using it throughout the dinner—it adds so much to the art of living.

The tables illustrated here are just two examples of how exquisite Heisey glass, by its very nature, aids the hostess in creating beautiful arrangements. The formal dinner table on the opposite page uses an etched Heisey pattern throughout the various courses. The silver is set for shrimp cocktail, soup, fish, salad and meat courses. The table above is more informal, having bread and butter plates. The glass is Heisey's Lily of France design. The silver is laid for soup, meat and salad.
